

Promoting youth water diplomacy in Central Asia

**Nuraddin Murshudlu, Senior Economic
and Environmental Officer**

OSCE Programme Office in Astana

The OSCE Programme Office in Astana

The Economic and Environmental Dimension:

- Combating corruption
- AML/CFT
- Trade and connectivity
- SME development and investment attraction
- Water management
- Environmental protection
- Disaster risk reduction

Environmental portfolio

The Office's objectives related to sustainable development and environmental protection include:

- Strengthening environmental governance
- Addressing security threats related to the environment
- Supporting sustainable development
- Enhancing public participation and awareness

Central Asian Leadership Programme

- Main objective: to promote the role and voice of young professionals in regional co-operation
- In partnership with the Regional Environmental Centre for Central Asia
- 14 programmes already took place
- Youth alumni network of over 400 members from Central Asian countries and Afghanistan (governmental bodies, the private sector, and academic institutions)
- Topics address most pressing current and potential regional environmental challenges

14th CALP

- Topic: glacial horizons and climate-sensitive mountain disaster risk management in Central Asia
- 25 participants: from every CA country (12 women and 13 men)

- Sub-topics: Glacial dynamics, climate change adaptation, water diplomacy, and gender considerations in water governance

Organization for Security and
Co-operation in Europe
Programme Office in Astana

Thank you!
